Address:
Hyderabad
Telangana, India

Oracle Skills:
VBCS, OIC, ATP, BI Publisher, ORDS, REST/SOAP

Programming:
JavaScript, PL/SQL, SQL, Shell Scripting, HTML/CSS

Active Oracle Certification:
Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate

Integration & Dev Tools:
Postman, SOAP UI, SQL Developer, WinSCP, PuTTY, Azure DevOps, Visual Studio

Other Skills:
Leadership
Relationship Building
Stakeholder Management
Project Management
Mentoring and Training

Awards:
3 Outstanding Awards
4 Applause Awards
6 Spot Awards

Languages:
English, Telugu and Hindi

Professional Summary:
Oracle PaaS Consultant with 5 years of experience, including 2+ years of leading the design and implementation of scalable Oracle Cloud extensions using VBCS, OIC, and ATP. Known for building intuitive front-end apps, efficient back-end logic with PL/SQL, BI Reports and seamless Oracle REST APIs. Demonstrated success in architecting full-stack solutions across finance, procurement, and project management domains. Adept in technical leadership, stakeholder engagement, and driving automation and productivity across enterprise platforms.

Education:

B. Tech in CSE (2016-2020)	National Institute of Technology, Andhra Pradesh, India	CGPA 7.62
Intermediate (2014-2016)	Sri Chaitanya Jr College Hyderabad, India	97.9 %
10th Class (2014)	Greenwood High School Warangal, India	CGPA 10.00

Professional Experience:
Deloitte USI, Hyderabad, India - Consultant & Team Lead, Oracle PaaS Extensions
Sept 2020 - Present
Contact: apsaiteja@deloitte.com

Project Experience-3: Designed and delivered a full-stack VBCS application used by 50+ suppliers to submit timecards, supporting both Time & Material and Fixed Price models. Integrated with Oracle Fusion Cloud (BPAs, POs, Supplier Portal) to ensure compliance and automation of procurement flows. Developed OIC integrations to sync POs and BPAs to ATP and auto-generate receipts, reducing manual intervention by ~60%. Enabled approval workflows with automated routing, cutting invoice processing time from 5 days to <2 days. Solution handled ~10,000+ timecard entries annually across 3 business units.

Project Experience-2: Developed 2 enterprise-grade Oracle VBCS applications to manage 5,000+ job records and 15,000+ job assignments across departments. Designed normalized ATP schema and implemented PL/SQL packages for bulk insert/update operations. Created audit trail with timestamp-based tracking, enhancing visibility of changes across users and improving traceability by 80%. Built reusable UI fragments with dynamic form rendering, improving development speed by 40% in future projects. Integrated with OIC and REST APIs for employee and department data, eliminating need for manual lookup and reducing user entry errors by 30%.

Project Experience-1: Managed a team of 12 developers to deliver 1,500+ automated test scripts covering GL, PPM, and SCM modules in Oracle Cloud Fusion. Improved test cycle execution time by 70%, enabling faster regression cycles and earlier defect detection. Designed Angular-based front-end to support a custom data transformation application, which accelerated data migration prep by 50%. Collaborated with QA leads and functional consultants to align test coverage with 100+ key business scenarios. Contributed to reduced UAT cycle timelines from 4 weeks to 2.5 weeks in large-scale deployments.

Other Activities: Independently provisioned and configured Oracle OCI components, including ATP databases, REST enablement via ORDS, and OCI Object Storage for secure file handling. Attended Oracle AI Agent Studio Virtual Training for Partners, gaining exposure to next-generation AI-driven development tools and their integration with Oracle Cloud applications.
